Doporučení:

Společnost GRIFFINE nenes odpovědnost, pokud výrobci látek mezi naším vyhodnocením a aktuálním datem provedou změny, které způsobí poškození a neodpovídají našim testům. Je nutné dodržovat pokyny k těmto čisticím prostředkům (ředění atd.).

PO ČIŠTĚNÍ však doporučujeme povrch opláchnout vodou. Některé čisticí prostředky totiž obsahují přísady na bázi chemických solí, jako je například kvartérní amonium. Ty mohou v průběhu času způsobit skvrny na povrchu nebo po zaschnutí poškození, pokud povrch neopláchnou vodou.

Společnost GRIFFINE za to nemůže nést odpovědnost. Tyto testy byly provedeny na našich produktech před jakoukoli transformací. Po některých technických krocích a zpracování (zahřívání nebo jiné...) se mohou tyto vyhodnocené vlastnosti lišit, za což společnost GRIFFINE rovněž nemůže nést odpovědnost. Je nutné provést předchozí test, aby se potvrdilo, zda náš produkt reaguje přesně stejným způsobem a nevznikají žádné poškození.
