HOSPITALITY

LAFUMA MOBILIER, THE FRENCH OUTDOOR FURNITURE SPECIALIST JOINS PEUGEOT FRERES INDUSTRIE

As a restaurant or hotel owner, you may dream about outdoor furniture for your patio that is Made in France, durable and featuring the art of French living! LAFUMA MOBILIER is made for you.

Our dining range evolves this year with an adaptation of the HORIZON table with an aluminium base, offering a new option suited to the needs of hospitality dining professionals.

And the best is yet to come. In order to pursue our development and offer ever more innovative solutions for our customers, LAFUMA MOBILIER partners this year with PEUGEOT FRERES INDUSTRIE, its new shareholder. A French industrial concern for two centuries, PEUGEOT FRERES INDUSTRIE shares the values of an expectation of quality and family spirit with LAFUMA MOBILIER. This new pairing is going to allow support for our brand in its internationalisation and product development projects.

With the choice of LAFUMA MOBILIER you are opting for our solution of durable furniture that is inspired by, designed and manufactured in France: a choice of quality, service and proximity.

Arnaud du Mesnil

Our history

For over 70 years, Lafuma Mobilier has used its knowledge and experience to improve well-being and has played a part in their clients' moments of relaxation, sharing good times and having friends over.

The successors of the invention of the first metal framed backpacks by the Lafuma brothers, our employees add passion as they continue this made in France "furniture" knowledge and experience combining supremely comfortable fabrics and high resistance tubing.

In recent years, the brand has grown around several ranges (mealtime, relaxation, patio, poolside...) thus becoming an essential player in outdoor furniture. This growth has brought the brand to the professional market, in which it is investing by targeting cafés, hotels and restaurants.

This year this knowledge has been recognised with the presentation of the EPV Label. The Entreprise du Patrimoine Vivant (EPV) label is a recognition from the State established to honour French businesses with excellent craftsmanship and industrial knowledge.

**MADE IN
FRANCE**

LAFUMA MOBILIER, is a focal point of French savoir-faire

When the brand unveiled its first line of portable outdoor furniture in 1954, constructed of tube and canvas, everything was designed, developed and manufactured in Anneyron, Drôme. Nothing has changed in this regard, so LAFUMA MOBILIER can proudly assert its commitment to the local region and responsible practice.

Today, "Made in Anneyron" is the hallmark of expert design and manufacturing, integrating the entire production chain.

LAFUMA MOBILIER, LONGTIME® labelled products

LONGTIME® is the leading European label for products designed to last. It gives you the assurance that the products carrying the label are reliable and repairable, breaking with obsolescence.

The label is awarded to products impartially, after an audit of evaluation carried out by an independent control body. *The products labelled LONGTIME® are identified in the product pages.*

To create its range intended for cafés, hotels and restaurants, LAFUMA MOBILIER worked together with the BIG-GAME design studio. The brand chose to collaborate with this trio of young Swiss designers to create a high quality collection with essential components.

LAFUMA MOBILIER x BIG-GAME is an alliance of «smart design», of comfort, style and functionality.

BIG-GAME is a product design studio founded in 2004 in Lausanne by Elric Petit (Belg), Grégoire Jeanmonod (Swiss) and Augustin Scott de Martinville (Fr). These creators share a common preference for simple, functional and optimistic objects. They design products for brands such as Tectona, Hay, Habitat, Muji, Lexon or Alessi, and their work forms part of the permanent collections at the Centre Pompidou (Paris), the Museum für Gestaltung (Zürich) and the MoMA (NYC).

Frames, table tops and seat canvas

Aluminium frames

The Horizon table leg frames are now available in an aluminium version. This range is very light and completely corrosion resistant.

Galvanised steel frames

This steel is characterised by its excellent functional properties and its elevated level of mechanical resistance. It is galvanised over all the products in the range which gives them improved anti-corrosion properties.

Paint - far more than a simple colour...

The original look of our finishes makes it a material in its own right, with a deep richness and refined surface. Our steel frames are painted with 100% polyester powder-coated lacquers. They are notable for their excellent resistance to UV rays.

More than 15 years ago the paint facility converted to powders - cleaner for employees and customers, and offering more durability for products.

HPL table tops (10 mm)

HPL (High Pressure Laminate) is a compact laminate material comprising different resin layers.

This material is particularly resistant.

It is a durable, hygienic product that is easy to maintain. A little soapy water is all that is needed to clean stains; scouring creams and furniture cleaners or polishes are to be avoided.

2-year guarantee

All the products in our Hospitality range are guaranteed for 2 years* against:

1. Manufacturing faults.
2. Hidden defects.

For 2 years, Lafuma Mobilier will guarantee its products against all faults which prevent use.

The following are excluded from this guarantee:

1. Failure to follow the instructions for use or incorrect use of the product.
2. Defects arising from poor care of the product or an absence of maintenance.
3. The beginnings of corrosion arising from scratches or abrasion, corrosion problems following use in a salty, chlorinated and unventilated environment.
4. Usual wear of the materials used in the product:
 - Textile elements (including stripping).
 - Worn parts (plastic feet, laces, parts with contact with the ground).

**Condition of guarantee applying: the Lafuma Mobilier guarantee only applies with the presentation of a proof of purchase (invoice, receipt).*

LAFUMA MOBILIER Advice:

To extend the life of your product, consider storing it when you are not using it and if necessary, replace any worn parts that are found, at your retailer or distributor.
