Pation - Poolside	24
Relaxation	30
Balcony - Dining	34
Lounge	42
Accessories	48
Technical information	64
Sales contacts	70

Designed for your life

In an increasingly mobile society, where we expect to model spaces to suit our ways of living, where we select objects that make everyday life easier, LAFUMA MOBILIER has always been ahead of the game. The insistence on durability, comfort and ease-of-use constitute the basis of each LAFUMA MOBILIER product.

Ever since our first collection in the 1950s, our outdoor furniture has always been thought, designed and manufactured in our Anneyron plant, in the Drôme region in France.

LAFUMA MOBILIER «LIVING HERITAGE COMPANY» LABEL (EPV)

This label granted by the State in 2020 recognizes LAFUMA MOBILIER's knowhow in working with metal tubes and stretched fabrics. LAFUMA MOBILIER has then joined 1,500 French companies recognized for their artisanal knowhow and excellent manufacturing.

FURNITURE DESIGNED TO LAST

Made in Anneyron is today the guarantee of having control over our design and manufacture by integrating the entire production chain.

We are choosing regional *sourcing* – 60% of the raw materials come from France and 98% from Europe

– with the quality requirements – resistance to UV, weather, abrasion, etc.

RESPONSIBLE PRODUCTION

At LAFUMA MOBILIER we are committed to reducing our environmental impact and are including more and more recycled materials in our production cycle and in our packaging. In the Drôme workshops, no pollutants are released and our R&D teams are working on projects for recycling any production waste.

REPAIRABILITY AT THE HEART OF DESIGN

With some 200 listed products, LAFUMA MOBILIER plans for its collections to stay with you for as long as possible. Easy to dismantle and repairable, our furniture comes with a promise of long life which is good for you and the planet.

ALL OUR PRODUCTS ARE GUARANTEED FOR 5 YEARS

(except for range of accessories)

LAFUMA MOBILIER, LONGTIME® LABELLED PRODUCTS

LONGTIME® is the leading European label for products designed to last. It gives you the assurance that the products carrying the label are reliable and repairable, breaking with obsolescence. The label is awarded to products impartially, after an audit of evaluation carried out by an independent control body. *The products labelled LONGTIME® are identified in the product pages.*

With its new VENCE range for 2025, LAFUMA MOBILIER is announcing a new lounge offer, for extended aperitifs and great moments to be shared with family or friends!

VENCE is a set of furniture including lightweight practical armchairs, bench seats, and low tables, that you can set up quickly and store just as easily.

This range comes as part of our now iconic BeComfort® padded collection, which offers exceptional comfort for relaxing and enjoying lazy summer evenings.

With LAFUMA MOBILIER, you get 100% French outdoor furniture and moments of well-being and relaxation to be fully shared with friends and family!

Cleaning products

Textile stain remover – 500 ml

Eco-friendly stain remover for all textiles.
Vegetable-based composition. Effective against stains on all types of outdoor as well as interior textiles (all canvas, cushions, rugs, blankets etc.). Colour-safe. Bacteriostatic cleaner Foam spray which wipes off with a sponge.
Made in France.

Composition:

Main active ingredient derived from plants.

Perfume: essential oils.

Anionic surfactant < 5%.

Non-ionic surfactant < 5%.

pH neutral: 7 (+/-0.5).

Amount of VOC: 8.28%.

Ingredients according to the detergent regulations CE 648/ 2004.

100% recyclable packaging.

LFM5079 Neutre 0400

Before

After

2 in 1 oil for HPL – Restorer and anti-UV – 250 ml

For restoring a worn stained top, and protecting the new HPL tops of your tables to prevent UV damage.

Application volume: not diluted 8 ml/m² per coat - 250 ml covers approx. 31 m² depending on condition of the top.

Composition:

Based on vegetable oils.

No linseed (anti-yellowing).

Reinforced anti-UV. Viscosity: fluid. High fire point: 62°C.

Transport: not dangerous substance.

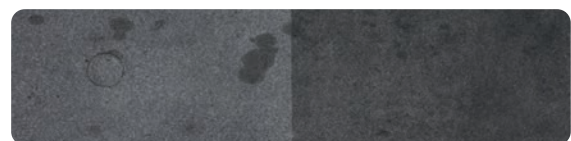

Flammable liquid storage: none.

EU limit value for VOC content: (cat A/f) 700 g/l (2007), 700 g/l (2010).

This product contains 400 g/l of VOC max.

TECHNICAL INFORMATION

ACIER STEEL

This entire range includes structures made from lacquered HEL (High Elastic Limit) steel tubing. High elastic limit steels have excellent functional properties such as suitability for cold-pressing, forming and welding. They also have a high level of strength. Powder coated finish (100% polyester powder, excellent UV resistance).

ACIER GALVANISÉ GALVANIZED STEEL

Frame in HLE (High tension) galvanised steel tubing Ø 25mm (anti-corrosion treatment). Powder coated finish (100% polyester powder, excellent UV resistance).

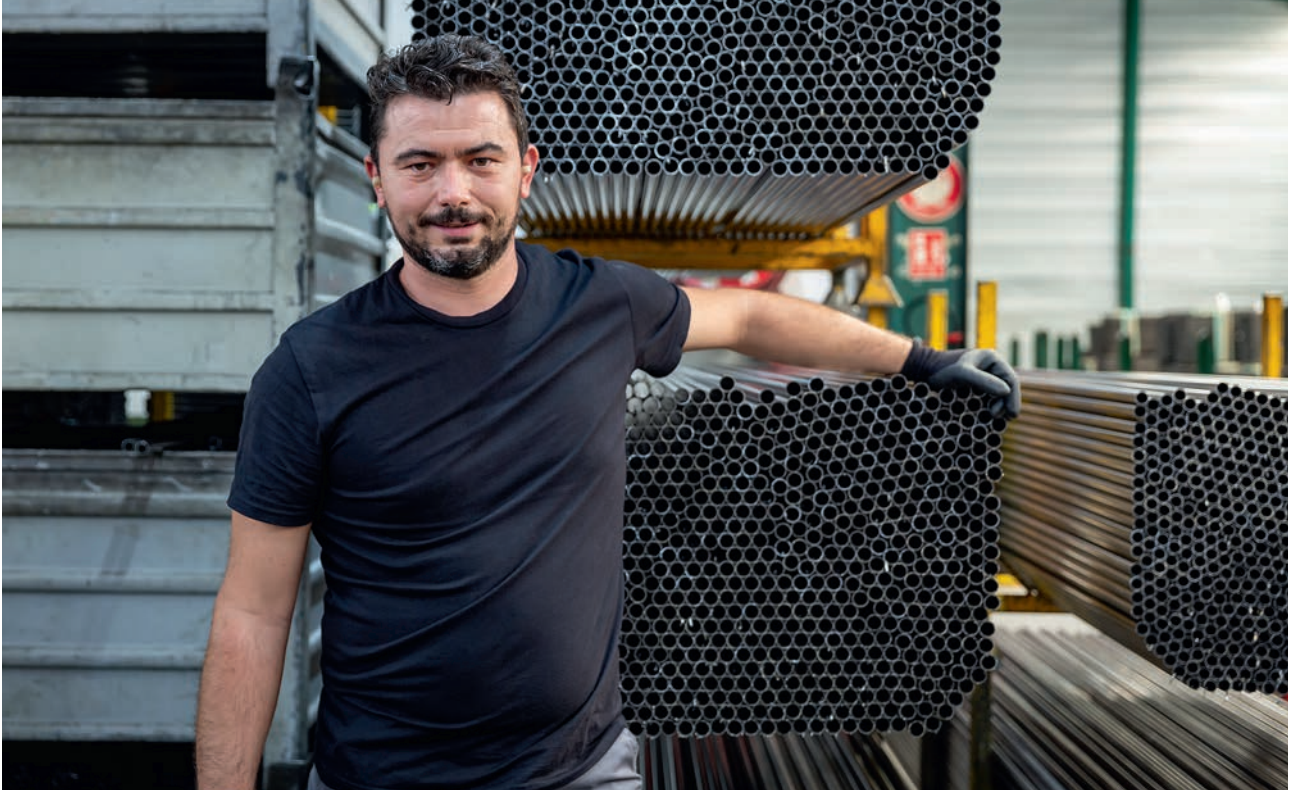

ALU MINIUM

This range with aluminium alloy frames is very light and resists corrosion completely.

PLATEAU HPL TABLETOP

These tables feature «HPL» (High Pressure Laminate), a compact laminate specially designed for outdoor use that outperforms comparable products on the market. HPL is extensively used nowadays as facing material in the building industry because of its extreme durability. Key features of HPL:

- UV-resistant.
- Easy to clean.
- Heat-resistant (up to 180 °C) unflammmable.
- Hygienic: food-safe (EN 1186 standard-compliant).

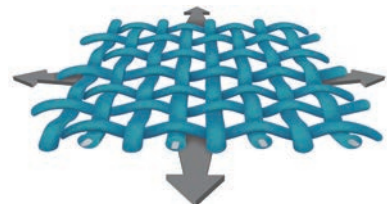

TECHNICAL INFORMATION

BATYLINE® **Serge Ferrari**

Batyline® is particularly suitable for furniture around swimming pool given its excellent UV resistance and open weave that does not retain water. Batyline® canvas is very resistant to tearing, does not distort and is easy to maintain.

Batch-dyed protective coating.
High strength multi-filament polyester thread.

Bi-axial tension for very high resistance.

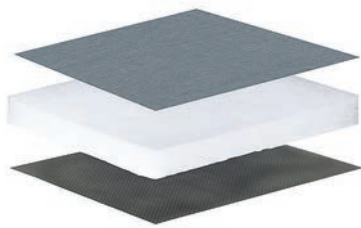

AIRLON

The Airlon's main features include exceptional mechanical strength and resistance to UV and bad weather, making it extremely durable. Easy to maintain and machine washable. It is made of 100% polyester fibre, smooth and soft to the touch.

LightComfort®

Strong «deco» acrylic fabric, UV resistant, water-repellent and easy to clean. The use of high-density foam lining provides great seating comfort and ensures longer life for the product.

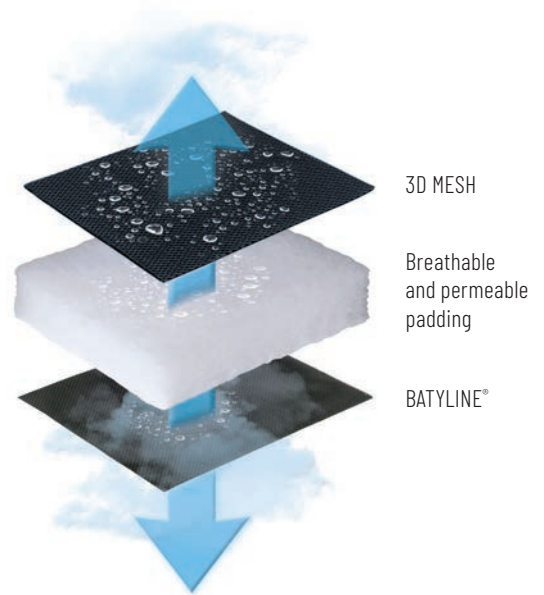

100% acrylic
High density padding
Propyl

AirComfort®

The AIRCOMFORT® «triple technical layer» cushion is the result of lengthy research in our laboratories on seating comfort and the new indoor/outdoor furniture trends.

- Combination of breathable and permeable materials.
- Does not retain water., promotes air circulation, quick drying.
- Good resistance to UV.
- Very comfortable seating material.

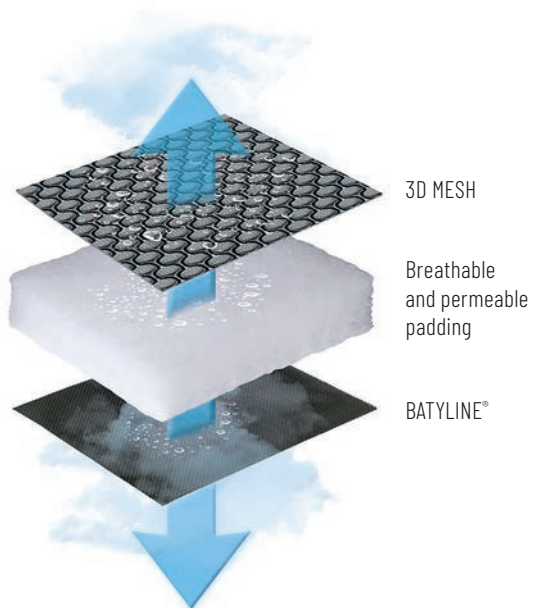

BeComfort®

Test the natural blend of trend and well-being!

BeComfort®, is the combination of LAFUMA MOBILIER's technical expertise and exclusive design DNA.

Settle on this hollow seat pad, with textured honeycomb pattern, breathable and permeable (quick-drying), with three layers for unrivalled comfort.

Its mass coloured thread gives this textile excellent UV resistance.

TECHNICAL INFORMATION

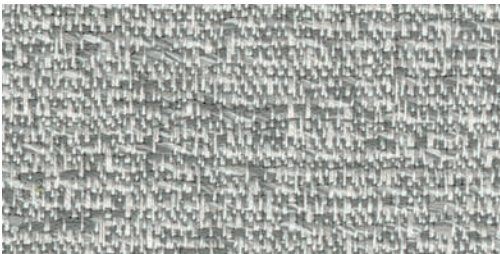

TUNDRA

Where style meets comfort!

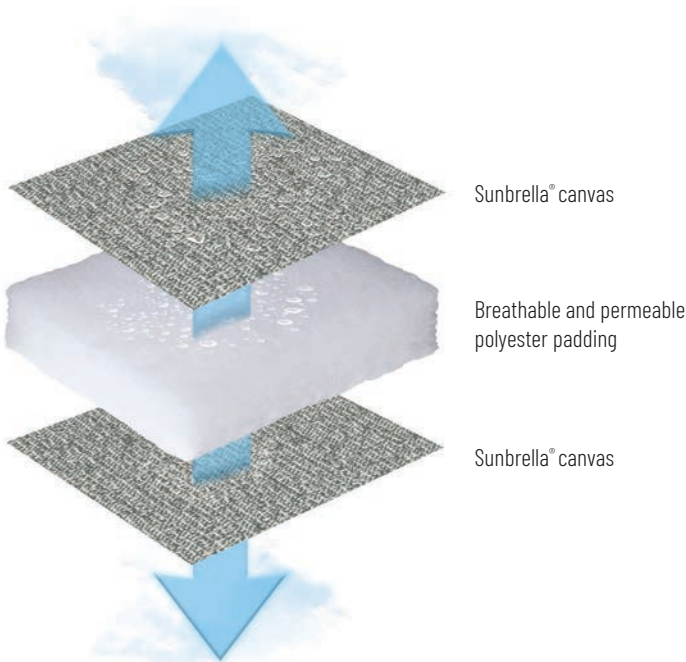

Discover this ultra-trendy super soft texture, with ready-made accents.

A soft padded technical fabric, designed for indoor/outdoor use, offering good resistance to the weather and everyday wear and tear. Resistant to sunlight, water-repellent, and easy to clean (with soapy water). All its technical qualities make this textile the ideal partner for your leisure.

 sunbrella®

Granite

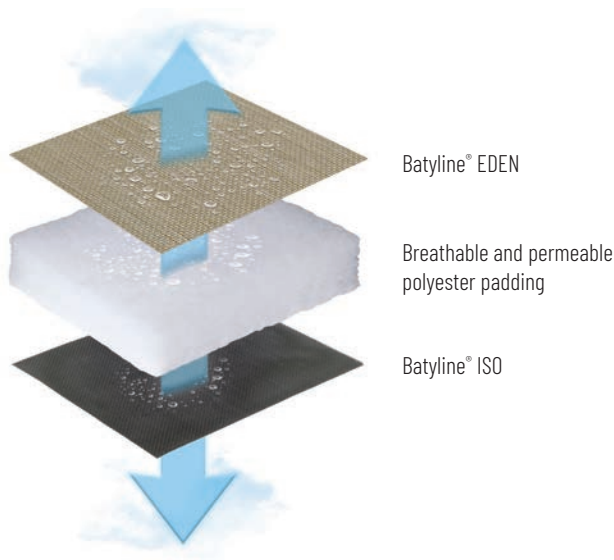

HEDONA

The perfect combination of technicality, comfort and style.

The result of a long research study into seating comfort and new products for indoor/outdoor use, the technical «3 layer» Hedona cushion offers unsurpassed comfort, while enabling the design of products with refined lines and a definite modern look.

The decorative part, made from Eden, combines the technical qualities of Batyline® with comfort, the feel of the fabric and style in an original way.

Hedona is easy to maintain, does not retain water, is breathable, dries quickly and is not affected by the sun. It is easy to keep clean with a little soapy water.

BATYLINE® Serge Ferrari

Batyline® fabric allows the creation of products which are particularly suited for use around the poolside, thanks to good resistance to UV exposure and open weave which does not retain water.

Batyline® fabrics have great resistance to tearing, they keep their shape and are easy to maintain.

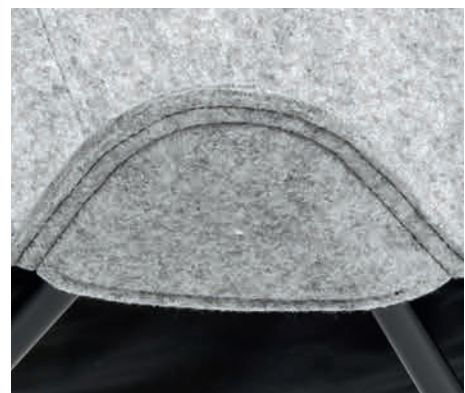

SOFT

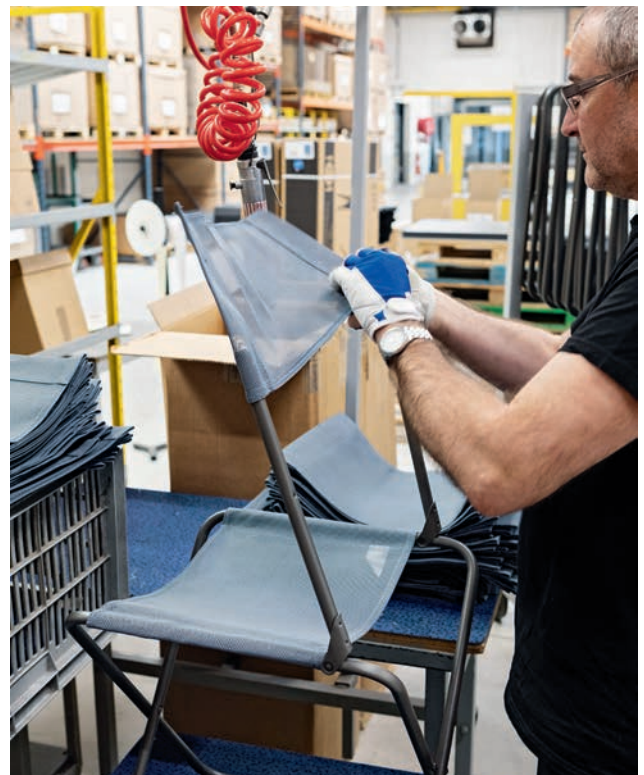

Modern and comfortable.

This technical textile, designed for indoor use, offers high resistance to daily usage.

Easy to clean, SOFT is made with two thicknesses: Airlon canvas and a thick feltlike fabric, 100% polyester, which conserves warmth and offers unequalled comfort.

This weave with mixed colours will provide a touch of design to your interior.

CLIP System

This connection device between tubes/fabrics by clips made from injected elastomer is an exclusive and patented Lafuma innovation.

CLIP's advantages :

- Excellent ergonomics by ensuring a better spread of the body's weight.
- Better back support.
- Improved comfort and firmer.
- Easy to use with very quick and simple assembly/dismantling of the canvas.
- Easy care and exceptional life-span.
